

BOOKMARK GREETING CARD

Illustrated by AnnK

It is recommended that thicker paper or card paper is used to print this mark/card out. This PDF is set up for 8.5" x 11". You can resize this file to any desired size through your print options. When printed, cut on the black edge. You can use scissors but an x-acto blade/craft knife is better suited for this (be careful). Once you are done cutting, fold in in half where directed. You can glue both halves together if you want a solid bookmark or leave it open for a reading note marker or a greeting card option.
