

It is recommended that thicker paper or card paper is used to print this box out. This PDF is set up for 8.5" x 11". When printed, cut on the white SOLID on the outside of the shapes, make sure not to cut off any tabs. You can use scissors but an x-acto blade is better suited for this (be careful). Once you are done cutting, fold all the parts of your box where there are DOTTED lines. This will prepare the box for assembly. Now, it's time to put your box together by glue the tab to their corresponding sides. The recipe cards are on a second sheet and can be printed out cut and now inserted into your box.
